

First and foremost, Rey Mellomida is a **Family Man**. He believes parenting is the most important job of all because how we raise our children, will eventually determine the outcome and the future of the human race.

Rey is an Author and Self-Publishes his own work, in which he writes about the many LifeTips he has learned and discovered in life to help and to give our Children the LifeTools they need to Thrive, not just to survive.

**Remegio "Rey" Mellomida**  
**IT Specialist**  
**EZ Financial Group, LLC**

Rey is also a Mentor and Life Coach to the young adults, they are our leaders and the future of this world after all.

Rey has also been a Public Speaker and Trainer for various local, national and international groups for many different networking companies.

He enlisted in the US Navy right out of high school and dedicated 25 years in the military. He saved the Navy thousands of dollars fixing various machineries and equipment that was not functioning for months, and some equipment that were inoperable for over four years. But it only took Rey a couple of weeks to fix and others only took a couple of days. He even fixed a Navy SEAL attack boat that didn't have full functionality for over a year. These and many other great skills and acumen that Rey possesses earned him Sailor of the Quarter and Sailor of Year numerous times.

While in the Navy Reserves, Rey worked for United Parcel Service for 16 years. He started out as a loader/unloader and quickly promoted to Supervisor, then became a Technician and eventually promoted to an IT Specialist and an IT Supervisor in record time. Rey created systems which saved UPS thousands of dollars. While working in the Napa Center he created a training program that allowed brand new loaders to be able to load three package vehicles on their own in just 3 days. While running the Preload operation, Napa was the #1 UPS Center in the entire district four years in a row, until he transferred to the IT Department. As an IT, Rey created an online messaging and communication system for the technicians. He also created a district-wide reporting system for the Managers. The system saved the managers hundreds of man-hours every month that it was adopted and made into the standard reporting system for the entire UPS Company.

Right before retiring from the US Navy in 2008, Rey passed the Real Estate exam and have been since, a Real Estate Consultant in the state of California. He helped families become home owners and helped investors acquire real estate rentals to add to their portfolio. And after just a couple of years or so in Real Estate, Rey partnered with his ex-wife (a lender) to create a system that allowed all his buyers to purchase a home and closed the deals within just 30 days, some in just 15 days.

Rey has come a long way. At eleven years old when his family migrated to California from the Philippines, he was timid, shy, had no confidence whatsoever and he barely spoke English. Since then, he has traveled the world, experienced life, accomplished many great things and helped people along the way. And no matter where or what Rey is challenged with, he can learn anything, overcome and Thrive.

**Favorite Quote: "Today is a good day. I woke up this morning!" (Rey Mellomida)**
